# About T.J. Feeley

*Artist: someone who wonders... then discovers ... then creates...*

**T.J. Feeley** is a contemporary western and wildlife artist born and raised in Cody, Wyoming. An accomplished artist, he maintains studios in both Cody, Wyoming and Palm Beach, Florida.

*CORNER BRONZE™* is a new artistic concept developed by **T.J. Feeley**. *The CORNER BRONZE™* artwork allows bronze collectors to mount a **T.J. Feeley** bronze into the corner of any room.

*T.J. Feeley • FREEDOM*

**CORNER BRONZE™**

## How Does *CORNER BRONZE™* Work?

The design of the *CORNER BRONZE™* is for a standard wood frame house.

The *CORNER BRONZE™* is a two-part system. The mounting device and main bronze go together to make one unit.

## MOUNTING DEVICE

---

The most important part of the *CORNER BRONZE™* concept is the mounting device.

The mount is secured (with wood screws) into a corner where two walls adjoin. Once the mounting device is correctly installed in the corner location, the *CORNER BRONZE™* slides right in.

## WHY THE *CORNER BRONZE™* IDEA?

---

1. The *CORNER BRONZE™* and mounting device go together to make one unit. There are no visible screws or bolts.
2. The *CORNER BRONZE™* is interchangeable. This mounting device will go with **ALL T.J. Feeley *CORNER BRONZE™*** artwork.
3. The *CORNER BRONZE™* can be mounted in the corner of your room at any level you choose.
4. The *CORNER BRONZE™* is “kid-proof”. You won’t have to worry about small hands or big dogs.
5. The *CORNER BRONZE™* is design effective. Your current collection of paintings, lamps and furnishings will be enhanced by the *CORNER BRONZE™*.

## HOW TO MOUNT YOUR *CORNER BRONZE™*

---

The following pages will explain how to mount your *CORNER BRONZE™*

**It is strongly recommended that you employ a licensed professional contractor to do the job.**

## STEPS TO MOUNT YOUR CORNER BRONZE

---

The first decision in mounting your *CORNER BRONZE™* is to decide at what level in your corner you want your bronze to be. Hold the main bronze in different spots and find the best level for you.

The *CORNER BRONZE™* is a 90° device. All corners are not a true 90°. Don't worry about the fit; it will look suitable once you get it up.

Look at your main bronze and mount and you will realize how the two fit together. When you have decided on your location,

place the bronze mount in the corner at the desired level.

### IMPORTANT NOTE!

It is important to predrill your holes for the wood screws.

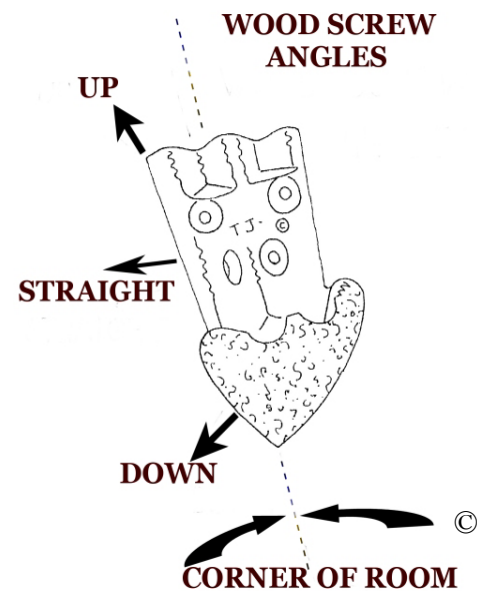

Having placed your mount in the corner, mark the holes with a pencil. After you have done this, remove the bronze mount.

The *CORNER BRONZE™* has six (6) wood screw holes; each set of holes has a different angle.

TOP: Up

MIDDLE: Straight In

BOTTOM: Down

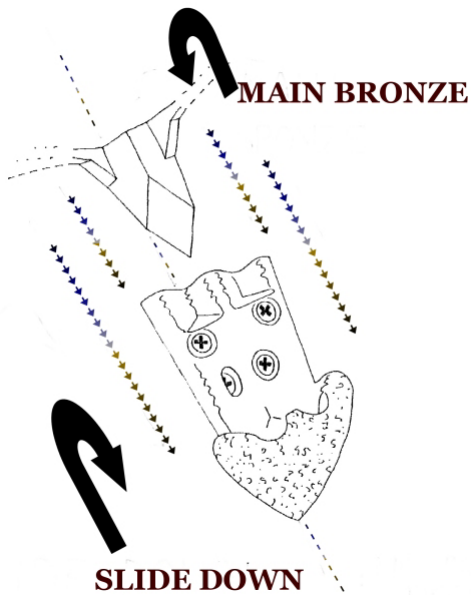

---

## TIME TO DRILL

Use a small size drill bit. Remember your angles as described above. Drill a small size hole on the previously drawn pencil marks; just enough to get your wood screws started. When you have predrilled your wood screw holes, replace the bronze mount, matching your holes where the wood screws will go.

It is important to begin with the bottom holes first to align the mount with the corner of your room. Once the bottom hold has been secured, go to the center, then to the top.

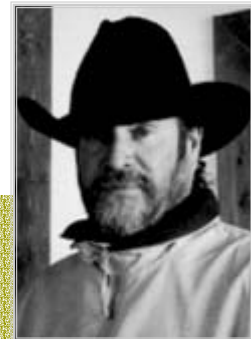

**YOU'RE DONE!!**

Slide your **T.J. Feeley CORNER BRONZE™** into the mounting bracket from the top down.

**ENJOY your new bronze art!**
